

I have my Otech computer set-up and turned on. What now?

After successfully logging in, the Xubuntu desktop will load. Initially you will see a panel at the bottom and icons on the screen, similar to a desktop that you would see using a Windows operating system. The bottom left icon launches the Applications Menu, similar to the Windows icon, and the lower right includes features such as networking information, volume control, and a clock.

After a few seconds, your computer will automatically launch Mozilla Firefox, the homepage for which has been set to a local web page that has been designed to help you in navigating and exploring this operating system. If you are a first time user, it is highly recommended that you go through this brief tutorial first to familiarize yourself with the Xubuntu environment. After viewing the tutorial, or if you opt to skip it, you may navigate to a website by entering the URL as you would normally in any browser.

file:///home/otec...Otech/index.html

file:///home/otech/Documents/Otech/index.html

Google Search

Welcome to the world of the Ubuntu Operating System!

These web pages are designed to aid in your exploration of this new Operating System.

If this is your first time using this system, we recommend that you go through all of these pages in order to become more familiar with the system.

You can do all of your normal school related tasks with this PC as you could with Windows (mostly).

- Web Browsing
- Word Documents
- Presentations
- Spreadsheets

[Begin Tutorial!](#)

Here is a link to Ubuntu's Help Documentation. It has all the info a beginner would need: help.ubuntu.com

And lastly, if you need more information, Google is a valuable tool. If you can't figure out how to play a movie, just Google: "ubuntu movie players".

[Getting to know the Desktop](#) [Using Libre Office for School](#)
