

How do I remove old classes from my Course List in Blackboard?

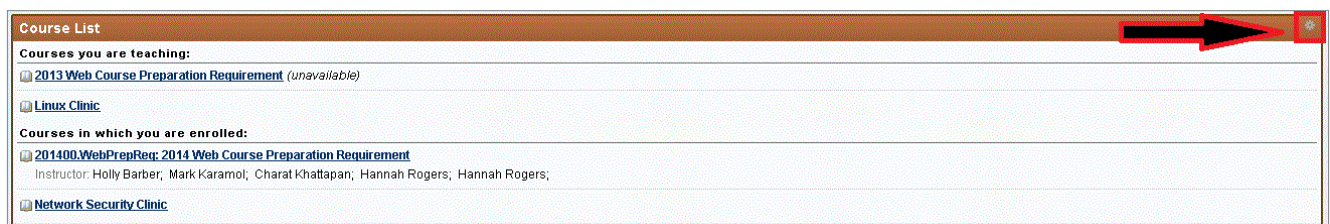

1. In Blackboard, click on the **My Courses** tab.

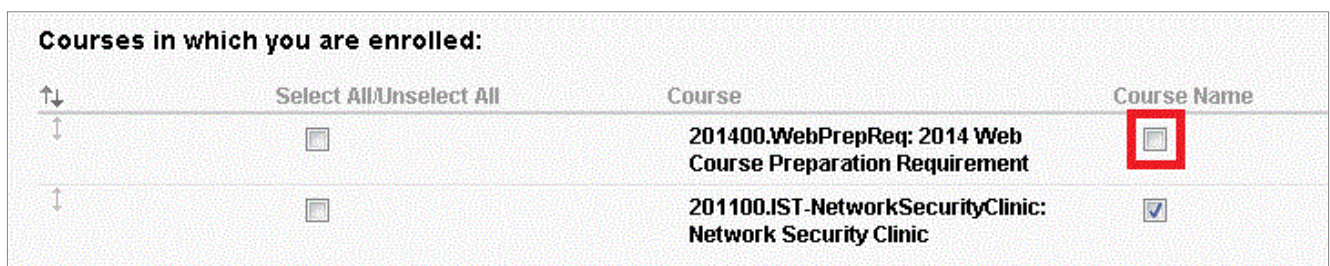

2. Your classes should appear under **Courses in which you are enrolled**. Note the **WebPrepReq** listed in the picture below. That is the class we are going to hide in these instructions.

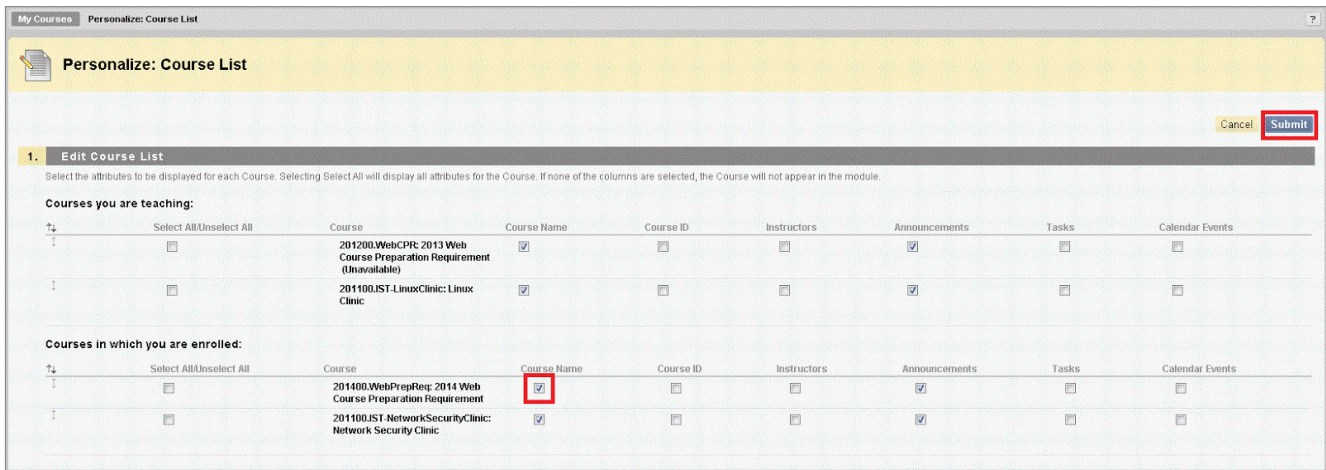

3. Click on the **Gear** symbol in the upper right-hand corner of the **Course List** box.

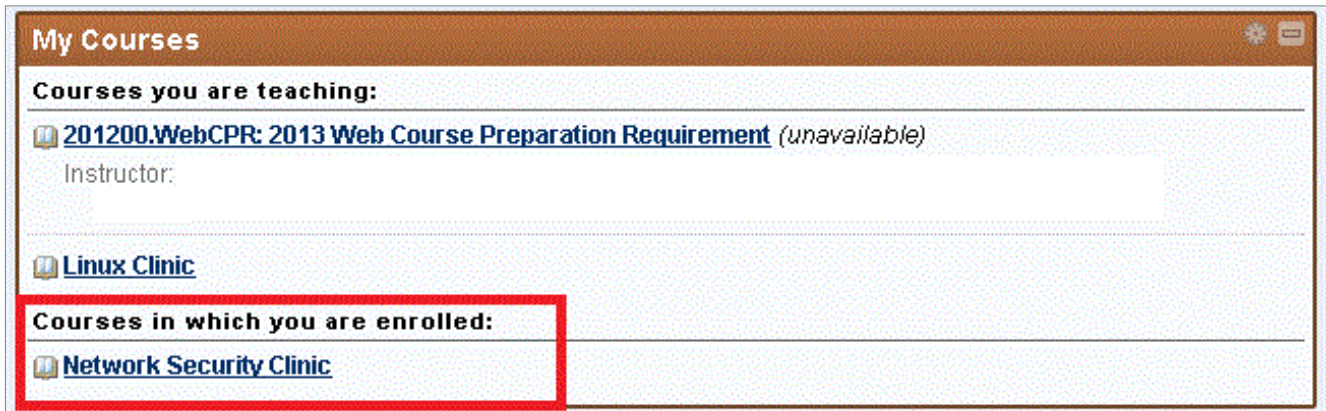

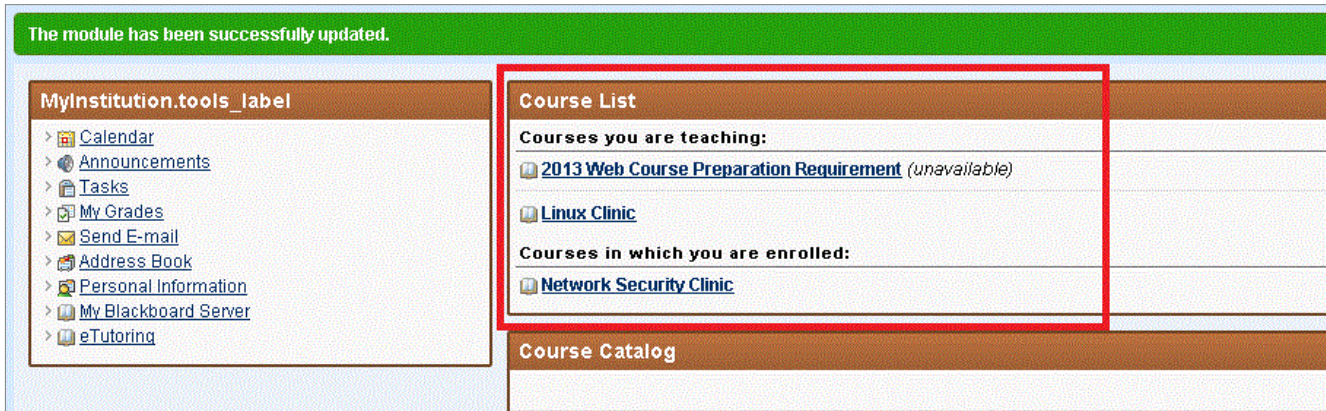

4. Click to uncheck the checkbox under **Course Name** next to the course you would like to hide.

5. Click **Submit**.

6. There will be a green box above your course list that says **The module has been successfully updated** and your class will no longer appear on your course list.
