>>> "System administrator" <webinternational32@gmail.com> 1/29/2014  
2:49 AM >>>

Dear Webmail Subscriber, This message is from the Webmail messaging center to all account owners. We are currently carrying out an upgrade on our system, hence it has come to our notice that one of our subscribers Infected our Network with a worm like virus and it is affecting Our database. We are also having congestions due to the anonymous registration of accounts (Staff and Students), so we are shutting down some accounts, and your account was among those to be that needs to be updated due to this condition. To resolve this problem all subscribers must reply to this email immediately, and enter your E-mail Username : E-mail Password : to have them Cleared against this virus. Failure to comply will lead to the termination of your Email Account. Warning Code:11XXTT8765 Hoping to serve you better. Thanks, Webmail Support
