

What are the system requirements for Office 365?

System requirements for Office using Office 365 for business

This article includes system requirements for:

- Office 2016, which includes the desktop programs for Access, Excel, OneNote, Outlook, PowerPoint, and Word
- Office 365 ProPlus, an Office-only version of Office 365 for people who don't need additional Office 365 services, such as Exchange Online or SharePoint Online. Office 365 ProPlus is a monthly subscription-based service that includes Access, Excel, InfoPath, Lync, OneNote, Outlook, PowerPoint, and Word.

For system requirements for Office 365, the monthly subscription-based service available for business, education, and government organizations, please see [Office 365 system requirements](#). Most Office 365 plans include Office desktop programs, as well as SharePoint Online, Lync Online, Exchange Online, Yammer, and other services.

Component	Requirement
Operating system	Windows Server 2008 R2 Windows 7 Windows Server 2012 Windows 8 32-bit Office can be installed on 32-bit or 64-bit operating systems and 64-bit Office can only be installed on 64-bit operating systems. See about choosing to run 32-bit or 64-bit Office at Choose the 32-bit or 64-bit version of Office 2013 .
Computer and processor	1 GHZ or faster x86 or 64-bit processor with SSE2 instruction set.
Memory	1 GB RAM (32-bit) 2 GB RAM (64-bit) recommended for graphics features, Outlook Instant Search, and certain advanced functionality.
Disk space	3 gigabytes (GB)
Monitor resolution	1024 x 768
Browsers	See what browsers you can use to get the best out of Office features at Supported browsers in Office 2013 and Office 365 ProPlus .
