

# **I. How are points calculated for the health evaluations? How can I improve my points?**

Criteria for point calculations vary for the different program evaluations. You can find the information on how points are calculated under "Program Information" on the program page in the online college catalog. Points calculations are available for both high school and college applicants. You can find your program by clicking on Academics > School of Nursing and Health Professions > click on the program of interest.

The best way to improve points is by completing the general education courses required in the major with a competitive GPA. We encourage you to meet with your Advisor to develop your academic plan and discuss your program competitiveness: Contact 567-661-2387 (Toledo Campus) or 567-429-3509 (Findlay Campus) to schedule an appointment.
