

What is Onet?

Onet was the old system that Owens used to provide users with access to on campus network storage through.

Due to the vendor no longer supporting it the product it has been decommissioned.

For employees, if you utilize an Owens' issued laptop you may request VPN access for off campus access to internal resources.

An additional alternative for employees is the use of Microsoft OneDrive. It is

the cloud storage offering you are entitled to as a current employee, and will let

you access files stored there from a browser anywhere.

As on campus storage for students is no longer provisioned they should

continue to utilize their **OneDrive** for cloud storage by logging in
